

THAW A CREATURE

THAW A CREATURE - V0.5 / V0.9 REVISION SUMMARY

This pack promotes the post-Day-5 design revision to canonical documentation.

Locked structural changes

- One server-authoritative Ice `WeightMultiplier` is rolled at wilderness spawn.
- $\text{Scale} = \text{cbrt}(\text{ActualWeight} / \text{ReferenceWeight}) = \text{cbrt}(\text{WeightMultiplier})$.
- The exact size roll survives wilderness -> carry -> thaw -> reveal -> creature copy.
- Visual Scale supports approximately 0.75x to 5.0x.
- Rare 3.5x-5.0x results are intentional jackpot/social-trophy events.
- Creature ownership becomes per-copy using `CreatureGUID`.
- Species define baseline Income/Speed; copy Scale modifies the final stats.
- $\text{FinalIncome} = \text{round}(\text{BaseIncomePerSecond} * \text{Scale}^2)$.
- $\text{SpeedMultiplier} = 1 + 0.15 * (\text{Scale} - 1)$.
- Pen income remains one aggregate server payment every 1 second.
- Warmth becomes big-number uncapped progression.
- Recommended Warmth grows by orders of magnitude and remains guidance only.
- Regions use cold multipliers so large Warmth numbers remain meaningful without requiring an enormous physical map.
- Hearth keeps the same function but receives dramatically stronger progression rates and presentation.
- Day 6-7 are implementation days with continuous task-level sanity testing.
- All 11 already-finished creature meshes should be used; do not recreate the old eight-blockout target.

First-pass size bands

Band	Chance	Visual Scale
Small	8.0%	0.75-0.95x
Normal	72.0%	0.95-1.25x
Large	15.0%	1.25-1.75x

Band	Chance	Visual Scale
Huge	4.0%	1.75-2.50x
Colossal	0.9%	2.50-3.50x
Absurd	0.1%	3.50-5.00x

Within each band, the weight roll is biased toward the lower bound so a result near 5x remains exceptionally rare.

First-pass big-number progression

Region	Main Ice	Recommended Warmth	Cold Multiplier
Snowfield	Regular	100	1x
Frozen Pass	Thick	1,000	10x
Ancient Expanse	Ancient	10,000	100x
Black Ice Hollow	Black	100,000	1,000x
Meteor Reach	Meteor	1,000,000	10,000x

Prototype Hearth expansion:

Hearth Level	Cost	Training Rate
1	Start	+10 Warmth/sec
2	\$150	+50/sec
3	\$1,000	+250/sec
4	\$7,500	+1,250/sec
5	\$60,000	+6,250/sec
6	\$500,000	+31,250/sec

D6-R00 Audit Result

The live Studio audit is complete.

Verified `Workspace.Creatures` roster:

BEAR
HRAESVLGR

ICESERPENT
MAMMOTH
NIDHOGG
PENGUIN
RABBIT
SEAL
SLEIPNIR
TROLL
WOLF

Eight currently match `CreatureConfig`: Bear, Mammoth, Nidhogg, Penguin, Rabbit, Seal, Troll, Wolf.

Three live models are currently unconfigured: Sleipnir, IceSerpent, Hraesvlgr.

All eleven currently lack `PrimaryPart` and a direct `Root`, and several retain authored `Model` scale above `1.0`. Those authored relative sizes are evidence for later `BaseVisualScale` design rather than values to flatten automatically.

No new species stats, rarities, or Ice-pool assignments were invented during the audit.

Designer approval is still required before `D6-R05 - Configure All 11 Existing Creatures` for each species' final:

- Rarity/content assignment where unresolved;
- `ReferenceWeight`;
- `BaseVisualScale`;
- `BaseIncomePerSecond`;
- `BaseWalkSpeed`;
- eligible Ice pools.

Next implementation task

`D6-R01 - Per-Copy Creature Ownership Migration`

Migrate ownership/allocation to exact `CreatureGUID` copies before persistence. Do not assign invented species baselines during this migration.
